

Solar Prints

Children will learn how alternative energy, in this case solar power, can make all sorts of things run without the use of electricity or the use of batteries.

Students and/or teachers may pick the top three favorites from their classroom for display at Greener Delta. Thirty solar prints in all will be on display for everyone to see.

If you are interested in displaying solar prints at Greener Delta, please complete the entry form below and submit with the prints by mail, hand-delivered or placed in the night deposit box:

Greener Delta
